Login

Podem usar o login já cadastrado

Ex:

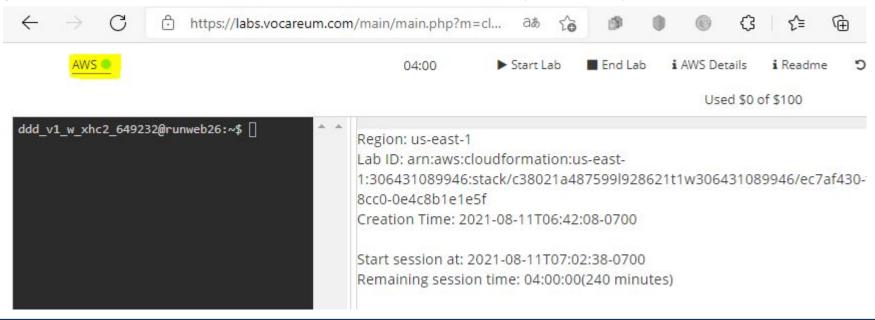

Iniciando o lab

Clique em Start Lab

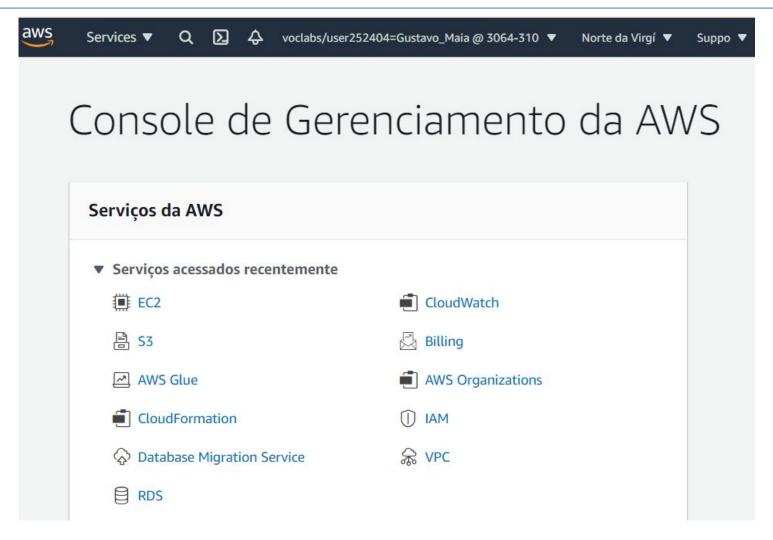

Aguardem até o link "AWS" ficar verde, depois clique em "AWS"

AWS Console

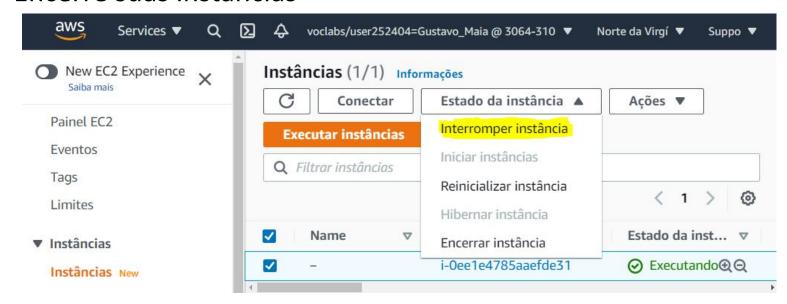

Bem vindo(a) ao AWS console, agora siga as orientações do professor.

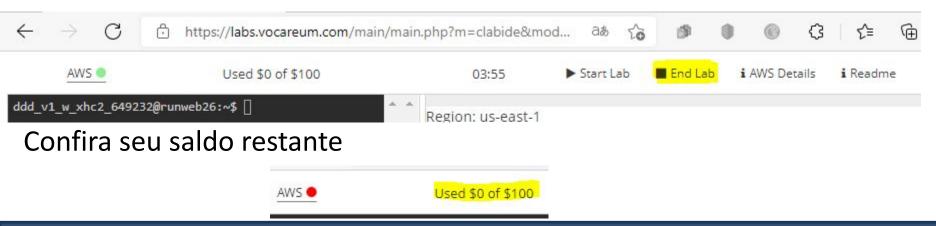

Antes de sair...

Encerre suas instancias

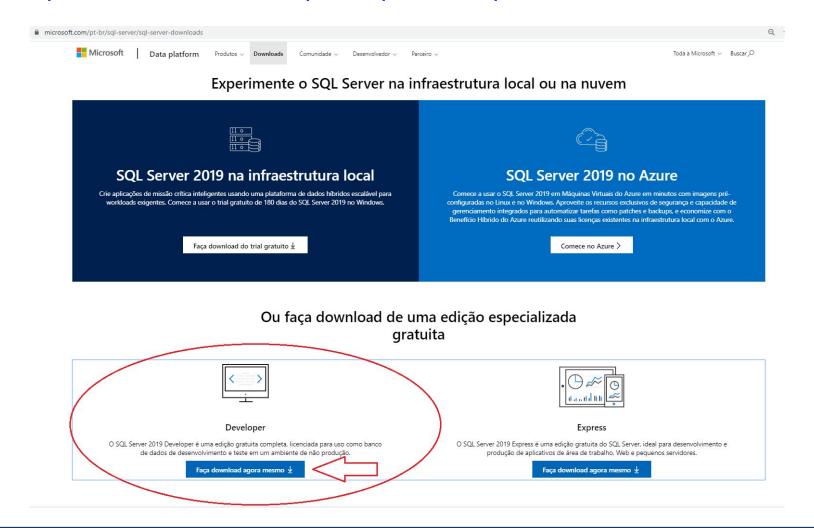

Encerre o LAB

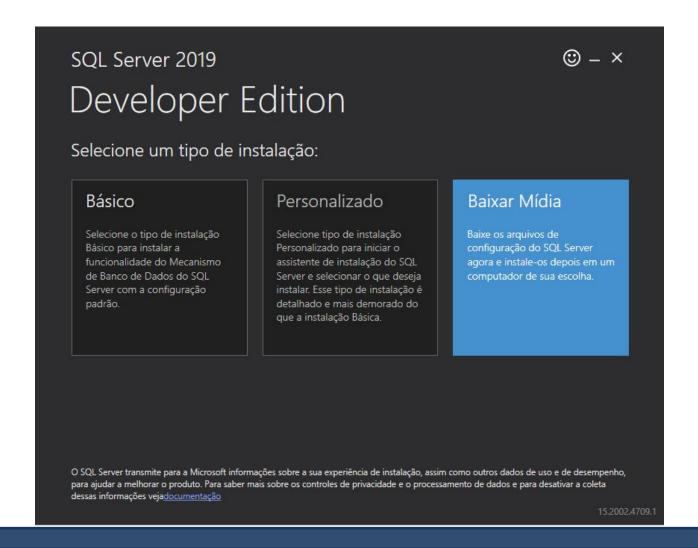

Instalação SQL Server (laaS)

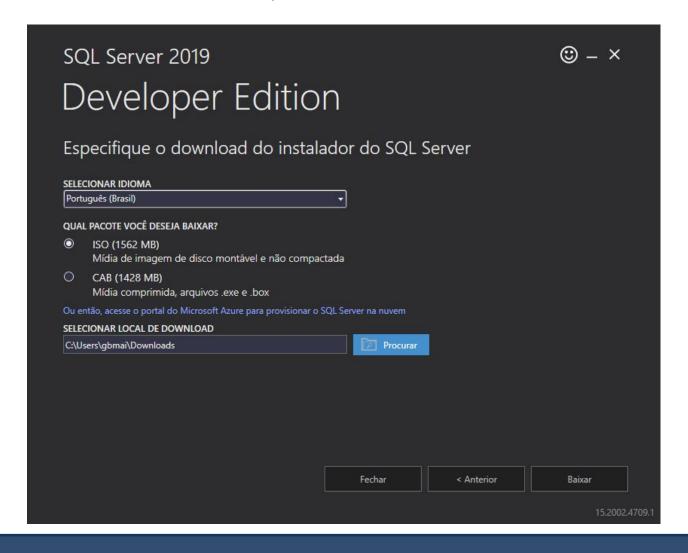

Server: https://www.microsoft.com/pt-br/sql-server/sql-server-downloads

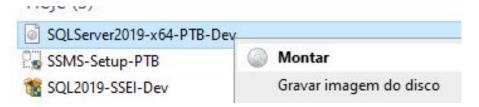

Arquivo: SQL2019-SSEI-Dev.exe

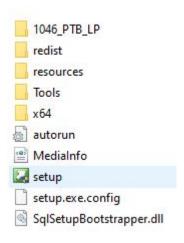

Baixe o mesmo idioma do seu Sistema Operacional

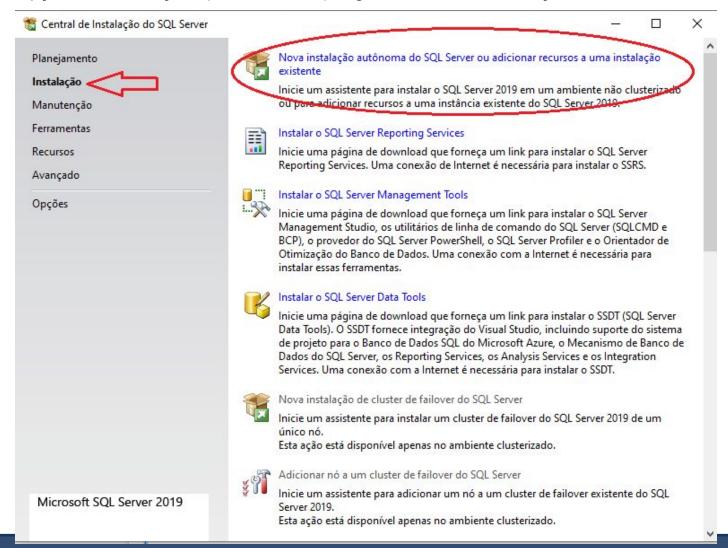

Botão direito sobre o arquivo .ISO e selecione "montar"

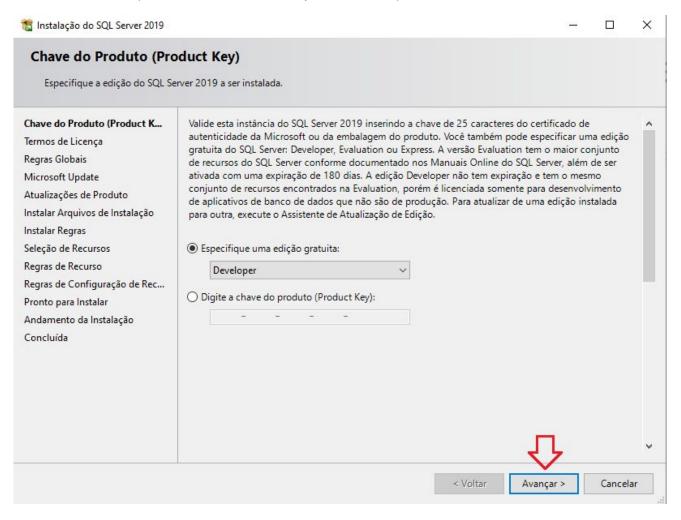

Execute o arquivo Setup.exe

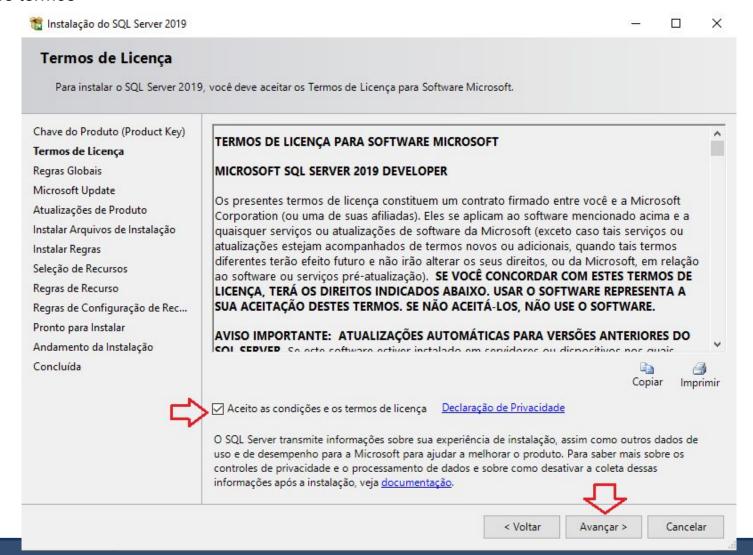

Selecione a opção de "Instalação" (menu lateral) seguido de "Nova Instalação...."

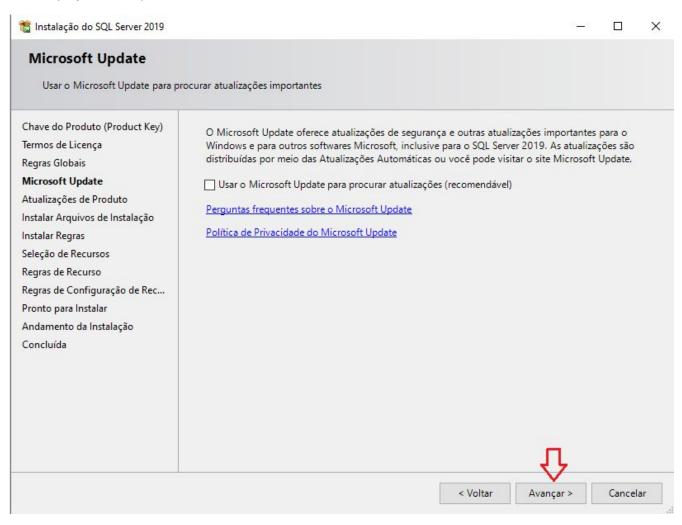

Não é necessária uma chave (usaremos a developer edition)

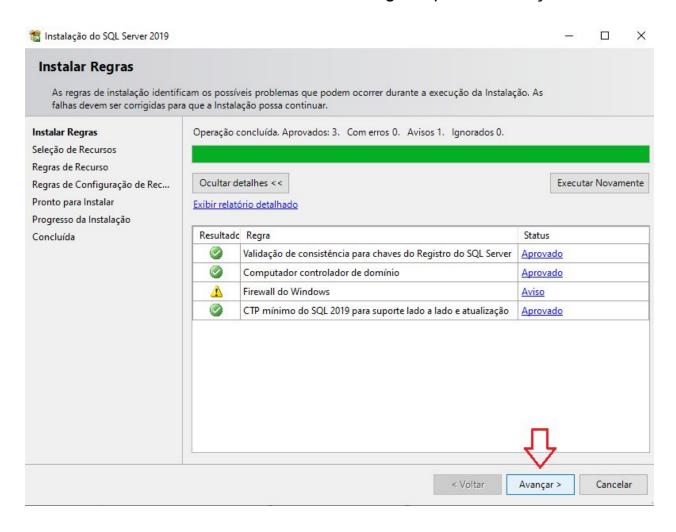

Aceite os termos

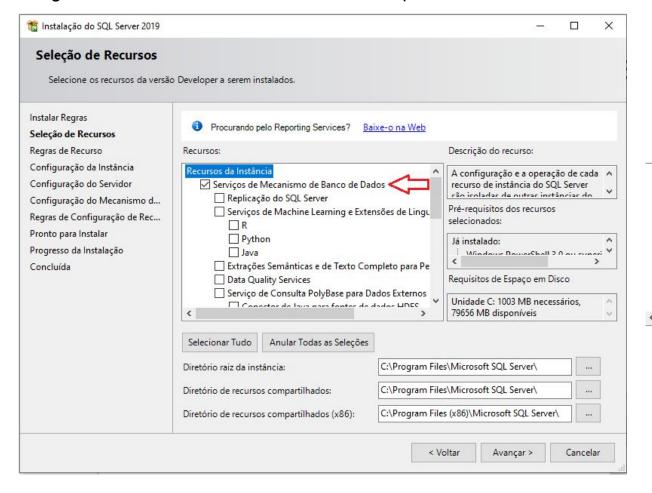

Ligar os updates (opcional)

É normal o firewall do windows ficar em amarelo/warning. Clique em avançar

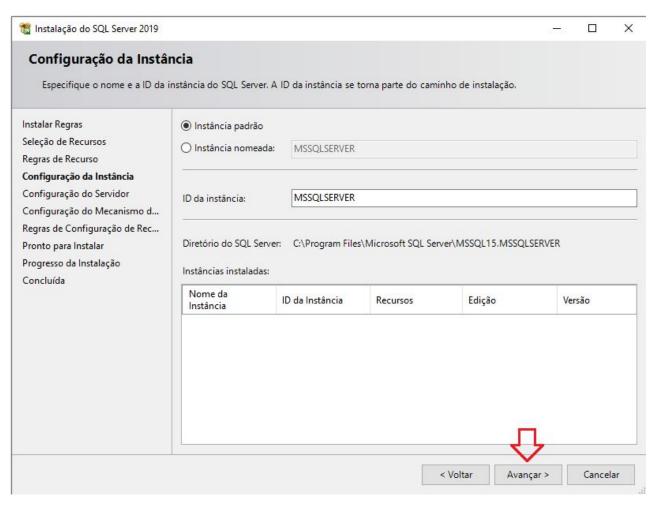

Obrigatório: Mecanismo de banco de dados, Opcional: Drivers de conectividade

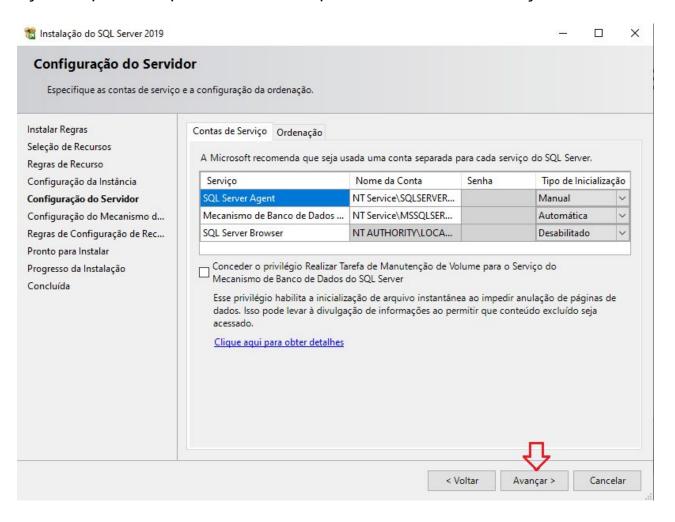

☐ Data Quality Client	^
✓ Conectividade das Ferramentas de Cliente	
☐ Integration Services	
☐ Mestre de Scale Out	
☐ Trabalhador de Scale Out	
☐ Versão de Compatibilidade das Ferramentas de Cliente	
SDK de Ferramentas de Cliente	
☐ Distributed Replay Controller	
☐ Distributed Replay Client	
✓ SDK de Conectividade de Cliente SQL	
Marter Data Consider	~
>	

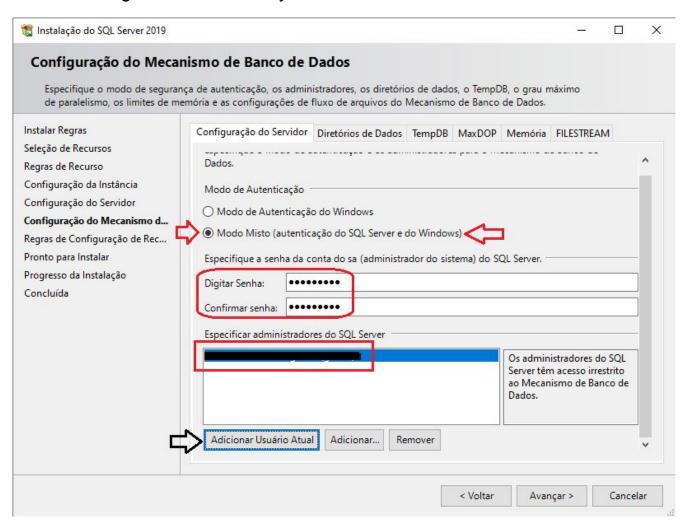

Nome padrão: MSSQLSERVER

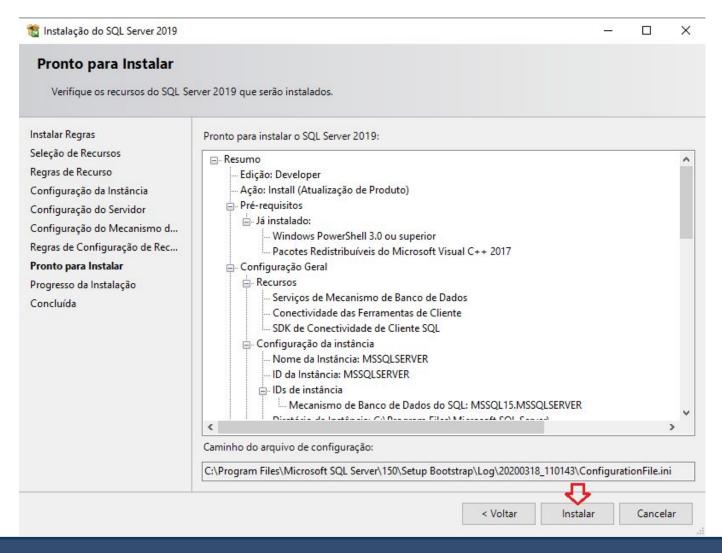

Sem configurações específicas para os usuários que vão executar os serviços

Autenticamente mista, digitem a senha de syaadmin, adicionem o usuário atual como administrador

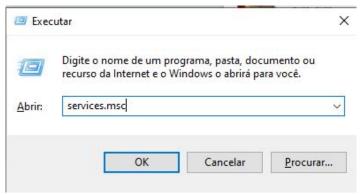

Finalmente: Instalar...

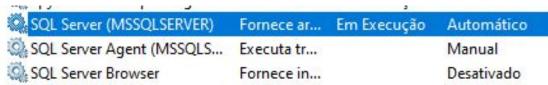

Serviços no Windows

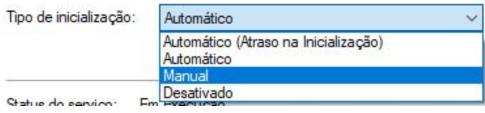

Tecla do Windows + R (ou iniciar > executar) depois services.msc

Garanta que o serviço está iniciado:

Opcionalmente, desligue a inicialização automática (mas ligue-o durante a aula)

O mesmo vale para os outros bancos

Instalação Cliente Local

MSSQL Client (SSMS)

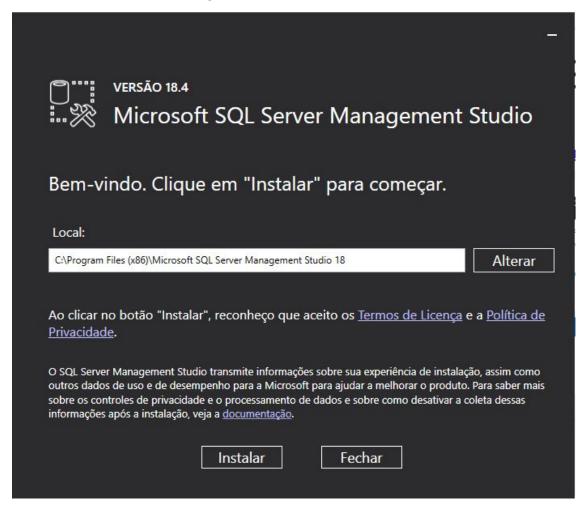

Cliente: https://www.microsoft.com/pt-br/sql-server/sql-server-downloads

MSSQL Client (SSMS)

Definam o local da instalação

Obrigado!

Gustavo Maia
